

# Summer Coding Leadership Academy (SCLA)

## Applications for SCLA 2018 are now open!

SCLA is an immersive experience where young men of color develop as technology leaders by learning computer programming, entrepreneurship, and public speaking. We use tech and coding as tools that lead to discipline, confidence, and critical thinking. During the 10-week summer coding academy our teens work closely with each other and our coaching staff to build web and mobile apps that address community problems - these serve as their minimal viable products.

At the end of SCLA, teens compete in Demo Day, a fast-pitch session where a panel of judges from the technology and business worlds select a winner based on viability, possible speed to market, and the clarity of how it solves a clear problem.

Location: University Of Southern California

Dates: June 14th, 2018-August 4th, 2018

Priority Deadline: February 16th, 2018

Regular Deadline: March 16th, 2018

Grades: 8th-10th
